Supply Arrangement

Approved Finishes

Panel Fabrics:

Grade A (Teknion Standard Finishes) Sample cards can be viewed online by clicking here for [Beeline](#), [Egypt](#) and [Wired Up](#).

Worksurface Laminates:

Worksurfaces are available in 33 color choices. They are the colors with HPL noted in the lower right corner under the color sample on the sample card. Granite and Ebony are LPL finishes and are not available for the worksurfaces.

Please note not all foundation laminate color options have a matching edge trim. Please refer to the sample card marked edge trim for a list of the color options for edge trims. Foundations laminate options that do NOT have a matching edge trim are: Blond Crosshatch, Fog Vapour, Dusk Vapour, Shade Vapour, White Matrix, Birch Parchment and Mushroom Parchment.

The gable and modesty finish on freestanding desks are available in color options marked LPL on the sample card. It is recommended to select a color that has both options available to ensure the same finish can be applied on both the surface and the gable and modesty panels. For example, Java Walnut is available as a surface as well as gable and modesty finish, but Fog vapour is available as a surface only, and is not available for a gable and modesty finish.

Sample cards can be viewed online by clicking here for [Foundation Laminate](#) and [edge trim](#).

Metal Storage, Panel Trim and workstation accessories (PAX):

Metal storage and panel trims and workstation accessories are available in 10 color choices. Please note handles for the storage items are only available in Ebony, Grey, Granite, Nevada, Storm White, Espresso and Latte for most products.

Sample cards can be viewed online by clicking here for [Foundation Paint](#).

Additional items for finish selection:

Electrical: in most cases the color options are: Storm white, platinum grey, very white and black.
